A Clinic For Ordinary People

Volunteers In Medicine Clinic provides free health care to eligible adult patients in a welcoming and comfortable environment. Eligibility is based on household income, not that of the individual. We even offer specialized services including women's health, diabetic care and mental health services. Need help with prescriptions? Our clinic even has its own in-house dispensary that eliminates the need to visit other pharmacies for many patients.

Who: Eligible patients in need of health care

What: Free health care services

Where: Volunteers In Medicine Clinic

Info: For more information on the eligibility screening process, services provided or hours of operation, call us or visit our website via the contact information listed above.
